

Nagulapalli Sri Vijaya Lakshmi

Full Stack Developer | React.js | Node.js | PostgreSQL | Python

srilunagulapalli396@gmail.com | linkedin.com/in/srilu396 | github.com/srilu396

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building responsive web applications using React.js, Next.js, Node.js, Express.js, MongoDB, MySQL, and modern frontend technologies. Experienced in developing REST APIs, authentication systems, database-driven applications, and responsive UI/UX designs. Also have practical exposure to Python, Machine Learning, Generative AI, Power BI, and Figma through academic, personal, and internship projects.

EDUCATION

Kakinada institute of engineering and technology for women's

Korangi ,Kakinada

B.TECH : CSE + (Artificial intelligence and Data Science) ; CGP : 8.39

2022-2026

TECHNICAL SKILLS

- **Frontend Development** : React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Redux, React Query
- **Backend Development** : Node.js, Express.js, REST APIs, Authentication & Auth ,Supabasen, API Integration
- **Database & Data** : MongoDB, MySQL, Prisma, Supabase, Database Design, Data Modeling
- **Programming Languages** : JavaScript, TypeScript, Python
- **AI / ML** : Machine Learning, Generative AI, Python, Hugging Face, Gemini API
- **Data & Analytics** : Power BI, Power Query, DAX, Microsoft Excel
- **Tools & Platforms** : Git, GitHub, VS Code, Postman, Figma, Vercel, Render, Supabase, Google Search Console

PROFESSIONAL EXPERIENCE

Software Engineering Intern - Devarya Solutions Private Limited (Dec 2025 – July 2026)

- Developed web application features using React.js, Next.js, TypeScript, Node.js, Express.js, and REST APIs.
- Built responsive and reusable UI components and integrated frontend applications with backend services.
- Worked with PostgreSQL, MySQL, MongoDB, and Prisma for database-driven functionality.
- Used Redux and React Query for application and server-state management.
- Implemented CRUD operations, authentication, authorization, validation, and API integrations.
- Tested APIs using Postman and debugged frontend, backend, database, and integration issues.
- Used Git/GitHub for version control and collaborated with team members throughout development and testing.

PROJECTS

Enterprise Learning Management System (LMS) | Team Project

[GitHub](#) | [Live Demo](#)

Tech Stack: Next.js, React Query, TypeScript, Node.js, Express.js, MySQL, REST APIs

- Developed and integrated role-based LMS functionality for Admin, Tutor, Student, and Institution Representative workflows.
- Implemented API-driven modules including users, institutions, students, courses, batches, quizzes, assignments, notifications, and dashboard features.
- Worked with authentication, authorization, CRUD operations, status management, API integration, and database relationships.
- Built reusable frontend components and integrated APIs using React Query for data fetching and synchronization.

TaskNova – Collaborative Task Management Platform

[GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, TanStack React Query, Tailwind CSS

- Developed a full-stack task management application with React.js frontend and Node.js/Express.js backend.
- Implemented REST APIs for task CRUD operations, authentication, and application data management. Integrated Socket.io for real-time notifications and live collaboration between team members.
- Integrated frontend and backend services and worked with MongoDB for persistent data storage.
- Applied reusable components and structured API workflows to build maintainable application features.

Srilu FashionHub — E-Commerce Web Application

[GitHub](#) | [Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets, JWT, Vercel, Render

- Developed and deployed a full-stack MERN e-commerce platform with separate React frontend and Node.js/Express backend, supporting customer and administrative workflows.
- Built REST APIs and real-time WebSocket functionality for order tracking, customer messaging, live activity monitoring, and store management. Implemented stock comparison, market sentiment analysis, and AI-powered investment assistance to support informed decision-making.
- Implemented JWT-based authentication, role-based authorization, bcrypt password hashing, CORS configuration, and environment-based application configuration.
- Deployed the frontend on Vercel, backend on Render, and database on MongoDB Atlas, configuring production environment variables, API connectivity, SPA routing, and deployment troubleshooting.

Inverse AI — AI-Powered Stock Prediction & Analysis Platform

[GitHub](#) | [Demo Video](#)

Tech Stack: Python , Flask , Machine Learning , React , MongoDB , Yahoo Finance API

- Developed a Python/Flask platform for stock analysis, ML-based price prediction, market tracking, and sentiment analysis.
- Integrated Yahoo Finance API and built backend services for market-data processing and prediction workflows.
- Implemented an AI chatbot for stock-market-related user queries.

OmniGenAI — AI-Powered Multi-Functional Generation Platform

[GitHub](#) | [Demo Video](#)

Tech Stack: Python , Hugging Face , Gemini API , Machine Learning , JavaScript , HTML , CSS

- Built a multi-functional Generative AI application for text, image, audio, and video use cases.
- Integrated Hugging Face models and Gemini API for content generation, document Q&A, code generation, image-to-text, and media-processing workflows.
- Implemented LLM-based document question-answering and prompt-driven AI features through a unified web interface.

CERTIFICATIONS

- Foundations of Modern Machine Learning (FMML) — IIIT Hyderabad
- Python Full Stack Development – AICTE
- Foundations of Python – Infosys
- Applied AI with Microsoft & SAP — TechSaksham (Edunet)
- Foundations of AI — Infosys
